

NEW AND IMPROVED

Recipe Costing Sheet

Calculate the cost of the ENTIRE recipe as well as how much it costs per serving.

name _____

RECIPE: the name of what you are making

YIELD: is how many servings the recipe makes.

- COST OF FULL PACKAGE:** how much does a pkg or container of this item cost? There are lists and links on my website to help you price ingredients
- HOW MUCH IS IN THAT PACKAGE?:** how much comes in that package? 3 lbs? 42 oz.? 12 eggs?
- COST PER UNIT RECIPE CALLS FOR:** divide the "cost of full pkg." (#1) by the "how much is in pkg?" (#2) to find out the "cost per pkg. unit"
- AMOUNT RECIPE CALLS FOR:** how much of this ingredient does your recipe call for?
- If the measurement unit in the recipe is not the same as the unit it is sold in, ex; lbs/ cups then do a conversion using onlineconversion.com or the [KitchenPro app](#).
- COST OF THE AMOUNT OF INGRED. USED IN RECIPE:** multiply the "cost per pkg. unit" (#3) x either "amount recipe calls for" (#4) OR the conversion (#5) to find out how much the "cost of the amount" is for your recipe. You may skip any ingredient that uses less than 1 Tb.
- TOTAL RECIPE COST:** add all of the ingredient costs in column 6
- RECIPE YIELD** (this is the number of servings)
- COST FOR ONE SERVING:** divide the "total recipe cost" by the recipe yield to find out how much one serving of this recipe will cost

Recipe:	Multiply #3 X #4 OR #5 (the one that matches)								
Yield:	1		2		3		4	5	6
Ingredient	Cost of full pkg. (bottle, can, bag, etc.)	÷	How much in pkg? Qty AND unit (lb, Tb, etc.)	=	Cost per pkg unit		How much does recipe call for? Qty AND unit (lb, Tb, etc.)	Convert "pkg" unit to recipe unit if different	Cost of this ingredient in this recipe
flour	\$18.00	÷	25 lbs	=	.72 a lb.	X	1.5 cups	.4 lbs	= .28
egg	\$14.27	÷	180 eggs	=	.08 an egg	X	3 eggs	n/a	= .24
